

Project Title: Develop a New Company Website

Description:

The project involves creating a new, modern, and responsive website for the company. The website should include the following features:

- Home page with company overview
- About Us page with company history and team information
- Services page detailing the services offered
- Contact Us page with a contact form and map
- Blog section for company updates and articles
- Integration with social media platforms
- SEO optimization
- User-friendly content management system for updates

Technical Requirements:

- Frontend: HTML5, CSS3, JavaScript, React.js
- Backend: Node.js, Express.js
- Database: MongoDB
- Hosting: AWS or similar cloud platform
- Security: HTTPS, secure user authentication, and data encryption
